EXPERIENCE

IT TECHNICIAN & INTERNAL SYSTEMS DEVELOPER

Colegio Montessori | January 2024 – Present

- Provide technical support for computers, classroom connectivity, cameras/NVR, printers, audiovisual equipment, and administrative systems.
- Develop and maintain internal web systems for school operations, including attendance, licenses, reports, letters, and psychology workflows.
- Build practical software solutions using PHP, SQL Server, JavaScript, React, TypeScript, and .NET.
- Troubleshoot Windows, Office, Zoom, network, hardware, and software issues for teachers, staff, and students.

TECHNICAL SUPPORT & PROGRAMMER

Las Delicias de Ximena | Calama, Chile

- Provided technical support, customer assistance, and systems administration for business operations.
- Diagnosed and resolved hardware, software, network, and operating system issues.
- Contributed to the development of a sales module to improve sales management and operational workflow.

TECHNICAL SUPPORT SPECIALIST

Cooperativa La Sagrada Familia R.L. | La Paz, Bolivia

- Provided technical support to staff across different cooperative branches.
- Performed computer maintenance, software installation, and hardware troubleshooting.
- Supported network and communications administration, including network points and camera-related infrastructure.

PROJECTS

VOCATIONAL GUIDANCE PLATFORM

React · TypeScript · .NET · SQL Server · Docker · JWT

Built a web platform for vocational tests and psychology workflows, including student and psychologist roles, authentication, answer validation, results management, and document upload features.

MONTEAPP

TypeScript · Lit · Vite · .NET · SQL Server · Redis

Built and maintained a parent-facing school application for weekly reports, letters, circulars, licenses, and notifications, helping improve communication between the school and parents.

PUBLIC GITHUB PROJECTS

React · TypeScript · Vite · Vitest · GitHub Actions · Docker

Developed public portfolio projects focused on frontend development, testing, API consumption, filtering, form handling, responsive UI, Docker setup, and CI workflows.

EDUCATION
